CITRUS MINT CLEANSER

Overview of Cleansers

Cleansing is the first and most important step in a facial regimen. This process lifts away impurities and environmental pollutants, creating a clean canvas and prepping skin for all of the steps to follow. Without proper cleansing of the skin, the active ingredients in toners, serums, and moisturizers cannot be absorbed effectively by the skin and perform optimally.

Healthy skin begins with a skin-balancing cleanser, ideally one with low foaming or no foaming properties. All Annmarie cleansers have an average pH of 5.5-5.6, fairly close to the natural pH of the skin. The importance of pH balanced cleansers is to ensure that the skin does not dry out and is protected from loss of hydration.

Not all cleansers are created equally. A common characteristic of a cleanser that is more alkaline, like bar soaps or cleansers with sulfates and other harsh surfactants, is HIGH foam. High alkalinity

compromises the skin's natural acid mantle (its protective barrier), which can leave the skin feeling dry, tight and more prone to skin sensitivities and even premature aging.

What is Sodium Lauryl Glucose Carboxylate?

We use Sodium Lauryl Glucose Carboxylate (Plantapon® LGC Sorb), a completely natural sugar-based surfactant, in our cleansers. SLGC is the INCI name for saponified oils (coconut oil and plant starches/sugars). This surfactant is ideal for use in facial cleansers and hair care products, due to its gentle cleansing, low-foaming properties. There have been no studies found that report any negative side effects regarding the use of Sodium Lauryl Glucose Carboxylate and it has been approved for use in certified organic cosmetics by both Organic Food Federation and Ecocert.

What is a surfactant?

A surfactant is an emulsifier, the ingredient that makes a cleanser “foam.”

ROSEMARY TONING MIST

Overview of Toning Mists

Tip:

Our toners can be used as a base for the Purifying Mud Mask to enhance the formula. We also recommend to spritz our toning mists after applying facial oil to help drive the oils deeper into the skin, increasing absorption.

Traditionally, toners were created to help restore the skin's pH after cleansing.

Some toners are designed to be spritzed on the face (like Annmarie toning mists), while others are meant to be poured onto a cotton ball or pad and gently swiped across the face to remove excess oil, dirt and grime.

To help maintain a healthy and radiant complexion, toners should have a gentle effect on the skin and contain soothing botanicals that nourish and hydrate. Toners formulated with high concentrations of alcohol targeted to control oil or blemish-prone skin should be avoided, as these can lead to dryness, discomfort and premature signs of aging.

Annmarie toning mists are formulated to:

- Enhance the absorption of other ingredients they're combined with

- Minimize the appearance of large pores
- Effectively hydrate the skin
- Set the stage for optimal moisturization
- Tone and tighten the skin
- Provide the skin with proper nutrition

Our toning mists are in a base of certified organic aloe vera which is derived from the aloe vera leaf, including the inner leaf processes of the plant.

The aloe is then freeze dried to retain all of the essential vitamins, minerals, phytonutrients and enzymes.

PROBIOTIC SERUM WITH TREMELLA

Overview of Serums

The purpose of using a serum is to infuse the skin with a potent dose of nutrients. Most serums have a dense infusion of synergistic ingredients that target specific skin concerns like fine lines, wrinkles, dark spots, dehydration and sensitivities. Serums are concentrated products!

A serum is always to be applied after cleansing the skin and before moisturizing. Serums are generally water-based and their main function is to help hydrate and bind moisture to the skin. Think of this step as putting on a layer of hydration. To create a healthy moisture balance in the skin, using a serum in conjunction with the proper moisturizer or facial oil is essential and will enhance your glow with time and consistency.

Serums contain highly effective ingredients like hyaluronic acid, vitamins, peptides, stem cells, plant cells, CO₂

extracts and antioxidants that work together to provide powerful age-defying benefits, giving skin beautiful, long-lasting results.

What is a Serum Blend?

Our serum blend is comprised of aloe vera juice, squalane, carrageenan, saccharide isomerate and non-GMO xanthan gum. Together, these ingredients create the perfect hydrating base and consistency for our serums. Aloe is hydrating and nutrient-rich, squalane is skin-smoothing and moisture-binding, carrageenan is water-binding, saccharide isomerate is emollient and xanthan gum is used to thicken the blend and prevent separation. Our non-GMO xanthan gum is sourced from fermented wood pulp!

What is the Difference Between All Three Signature Serums?

Our Anti-Aging Serum, Citrus Stem Cell Serum and Probiotic Serum with Tremella are all formulated to hydrate the skin

deeply and each have their own unique functions to serve specific skin types.

Anti-Aging Serum

A lightweight, nutritive serum ideal for sensitive, aging skin. This infusion is comprised of soothing, hydrating and antioxidant-rich botanicals formulated to offset early signs of aging and provide topical nutrition to support healthy skin daily. This everyday serum will help to plump up the look of fine lines and wrinkles, while also alleviating temporary redness common in sensitive skin.

Citrus Stem Cell Serum

A targeted serum formulated to increase the look of firmness and tightness in aging skin, enhancing the skin's quality and resilience. This serum is ideal for thicker and more textured skin that has had a lot of exposure to the elements, which is often accompanied by dark spots and an uneven skin tone. The unique brightening complex in this

serum works to effectively reduce the appearance of dark spots, while also addressing the concerns of fine lines, wrinkles and dull, lackluster skin.

Probiotic Serum with Tremella

This serum is formulated for all skin types and is ideal for those with compromised skin. This serum is a great choice for those transitioning from a chemical line to a natural line, helping to restore the skin with healthy flora. Overall, this serum helps to balance the skin's pH, improve skin hydration, enhance skin suppleness and reduce the appearance of temporary redness and other skin burdens.

A still life composition featuring several olives and vanilla beans. In the foreground, there are several olives, some dark purple and some green, with a few water droplets on their surfaces. In the background, several vanilla beans are visible, some whole and some cut. To the right, a large glass bottle filled with a golden-yellow liquid, presumably facial oil, is partially visible. HERBAL FACIAL OIL
FOR SENSITIVE SKIN

Overview of Facial Oils

Our facial oils (like our serums) are formulated using our unique, 3-step *Wild. Beautiful.* process that involves infusing herbs into large vats of carrier oils for up to 4 weeks, never heated above 95 degrees. This infusion method extracts all of the essential plant properties without compromising any nutrient value, resulting in very active facial oils yielding high levels of antioxidants, phytonutrients, vitamins, minerals and essential fatty acids.

The high antioxidant content of our facial oils can potentially cause the skin to become reactive, due to skin detoxification. This can also happen when transitioning from a more conventional line containing synthetic chemicals, to a natural line. The reaction can subside within a few weeks, but if it lasts longer, we recommend switching to our Herbal Facial Oil For Sensitive Skin as an alternative, because the herb infusion is less concentrated and there are no

added essential oils, making it ideal for skin prone to sensitivities.

Oils are the primary base ingredient for all of the Annmarie facial moisturizers because oils are truly superior in delivering proper moisture to the skin. In addition, they are nutrient dense and contain no fillers or waxes. Due to their liquid nature, oils are welcomed by the skin much more easily than creams.

Creams contain emulsifying wax that can create a build up on the surface of the skin leading to clogged pores, while also preventing the beneficial oils within the formula from actually penetrating into the skin. This is why oils on their own absorb with ease and are our preferred method for moisturizing the skin effectively!

ANTI-AGING EYE CREAM

Overview of Eye Cream

The skin around the eyes is much thinner than anywhere else on the face. There are minimal oil glands, which makes the eye area more prone to dryness, causing pronounced fine lines over time. The eyes can easily be stressed or strained due to certain facial expressions made or by squinting, which can accelerate signs of aging around the eyes.

Using active plant cells allows us to increase the potency of our skin care. We use a total of 150 million active plant cells per small batch of our Anti-Aging Eye Cream. These plant cells are comprised of phytoalexins (active molecules), polypeptides, proteins, lipids, fatty acids, sterols, sugars, vitamins, enzymes and amino acids. All of these elements supply essential nutrients to strengthen the skin's integrity. Because eye creams are concentrated products, other areas of the face (around the lips, neck or décolleté) can also benefit from eye cream application.

The benefits of using Anti-Aging Eye Cream include:

- Eases temporary puffiness
- Enhances the look of the skin's texture and quality
- Protects the skin from environmental stressors
- Soothes and calms

PURIFYING MUD MASK

Overview of Exfoliants & Masks

Exfoliants

Exfoliating is an essential step in any facial routine because it is the process of removing buildup, impurities and excess oils from the surface of the skin, while also refining the skin's texture and minimizing the appearance of enlarged pores. Exfoliation also allows for toners, serums and moisturizers to absorb more effectively into the skin.

Depending on your skin type, exfoliation should be performed 1-3x per week. If you have sensitive skin, less exfoliation is needed and if you have oily, combination or dull skin, more exfoliation is ideal.

Tip:

We recommend masking 1-3 times per week, depending on your skin type and the season.

The benefits of exfoliating include:

- Increases absorption of other skin care products
- Creates a brighter look by evening out the skin tone and texture
- Enhances skin smoothness and softness

- Decreases the appearance of fine lines and deep wrinkles

Masks

Face masks are packed with skin-loving ingredients. They are formulated with a range of benefits that hydrate, moisturize, purify, balance, tone, replenish nutrients, exfoliate, stimulate, rejuvenate and calm the skin. They truly are a pampering step to any facial routine, while supporting the skin on a deeper level.

SUN LOVE

Overview of Sun Protection

Most sun protection formulas list an SPF number on the label. SPF stands for “sun protection factor,” and is a measurement of protection from only UVB rays, which are the ones that cause redness and sunburn.

UVA rays are considered even more dangerous, as they penetrate skin more deeply and are linked to skin cancer. But SPF does not measure a sun protection formula against UVA rays—only UVB rays. To further explain—the SPF is the approximate measure of time a person who has applied sun protection to their skin can stay out in the sun without getting burned.

Our Sun Love has an SPF of 20. This formula is a safe and effective physical block from both UVA and UVB rays for everyday use, though it needs to be applied every hour if sitting in the sun for a prolonged period of time.

Zinc oxide, which offers superior broad spectrum protection, is not waterproof and it does wear off after a time. We also recommend additional protection like a hat, scarf or shade, if exposed to direct sun for long hours.

Overall, our Sun Love Sun Protection formula is an oil-based product that deeply moisturizes and protects the skin from premature aging, while offering antioxidant-rich oils that help shield skin from harsh elements.

RADIANT SKIN SILK

Overview of Body Care

The skin is the body's largest organ, and just like skin on our faces, the skin on our body can experience sensitivity, dryness and roughness. Because our skin is the last to receive nutrients from our diet, it's important that we provide topical support with nutrient-dense body care products! Consistent body care will slow signs of aging on areas that tend to get more elemental exposure: hands, neck, chest and shoulders.

Rosemary Peppermint Body Wash

This body wash closely resembles the Citrus Mint Cleanser formula (with the exception of the Witch Hazel Distillate and a different blend of essential oils). For those with oily and blemish-prone skin, this wash can be used on the face in addition to the body.

To help increase the lathering effect, use with a body exfoliation towel or loofah.

Coconut Body Oil

This is made using Extra Virgin Coconut Oil which is ideal for dry skin types.

Coconut oil may solidify at temperatures below 76°, which can impact the performance of the body oil pump. To avoid this, run bottle under hot water to liquify, then shake well. Our body oil may also be kept stored in the shower to help its consistency remain liquified.

Radiant Skin Silk

This is an effective body moisturizer for dehydrated skin types because it is formulated with our hydrating serum blend. Squalane, an effective emollient in our serum blend, provides optimal spreadability and aids in the absorption of other ingredients. It instantly hydrates the skin by locking in essential moisture.

If layering both body products, use Radiant Skin Silk first, which has a low molecular weight, then follow with Coconut Body Oil, which has a high molecular weight.

FOR BEST RESULTS

Use throughout the day. Apply liberally on lips or wherever dryness occurs.

KEY INGREDIENT BENEFITS

Cocoa Extract

The enticing aura of cocoa extract is at the forefront of our Antioxidant Lip Balm. It combines sultry aromatics with effective antioxidants.

Sea Buckthorn Fruit Oil

A skin-rejuvenating superfruit that boasts multiple vitamins (A, B, C, D, E) and a trio of powerful omegas, including the rare omega-7 essential fatty acid—which firm and hydrate fine lines.

ANTIOXIDANT LIP BALM

Buriti Fruit Oil

This deep red Amazonian fruit oil harnesses one of the richest sources of beta-carotene —a key protector of skin from environmental stress.

Cocoa Butter

A lip-loving fundamental that channels the ultra-nourishing properties of organic raw cacao to deliver a delectable yet potent mix of fatty acids, flavanoids, and polyphenols. This rich butter deeply hydrates and moisturizes dry skin.

FULL INGREDIENT LIST

*Olive oil, *beeswax, *cocoa butter, sea buckthorn fruit oil, *cocoa extract, buriti fruit oil, *rosehip fruit oil, *rosemary extract. **Organically grown or wildcrafted*

ANTIOXIDANT LIP BALM

Overview of Lip Care

Similar to the skin around the eyes, the lips have much thinner and more sensitive skin than anywhere else on the face. Lips have no oil glands, so they need extra moisture and protection throughout the day. If not properly moisturized, lips can get dry, chapped and even experience occasional peeling.

Rich in resveratrol, a natural polyphenol and powerful antioxidant, providing an even look to your skin tone; powerful antioxidant properties protect skin from environmental stressors.

Plant Cells of Madonna Lily & Poet's Narcissus

1.5 million plant cells present in each 15ml bottle of serum; their composition comprises phytoalexins (active molecules), polypeptides, proteins, lipids, fatty acids, sterols, sugars, vitamins, enzymes and amino-acids; supply essential nutrients to strengthen the skin's integrity.

WILD FRUIT SERUM

Copper Infused Water

Made with mountain spring water stored in a pure copper vessel for a minimum of 8 hours, infusing the water with lively copper ions in a process known in science as “oligodynamic”—recharging and energizing the water; copper has strong antioxidant properties; helps with clogged pores and oily skin; helps to remove dirt, oil and impurities; restores the skin’s natural glow; copper works as a conductor, synergizing the entire serum formula.

FULL INGREDIENT LIST

Massage and smooth into skin for the ultimate aromatherapeutic experience. Apply as little or as much as needed.

KEY INGREDIENT BENEFITS

Cardamom

Cardamom is a spice from the ginger family. It can improve the tone and texture of skin over time with a dense concentration of Vitamin C and antioxidants.

Shea Butter

A luscious, non-irritating moisturizer that is packed with Vitamin E, fatty acids and enriching nutrient content, making it ideal for soothing and softening sensitive skin.

PALO SANTO BODY BUTTER

Cocoa Butter

Our fair-trade cocoa butter boasts a dazzling array of potent polyphenols, protective antioxidants, and essential fatty acids. Derived from raw cocoa beans, it is rich in nutrients that feed, nourish, and hydrate skin—plus, its aroma is just plain delectable.

Palo Santo

A sensory treasure cherished for its deep, woody notes and sacred properties, palo santo essential oil calms the heart and grounds the soul. Root yourself in its warm aromatherapy.

FULL INGREDIENT LIST

*Shea nut butter, *cocoa butter, *extra virgin coconut oil, kukui nut oil, *macadamia nut oil, *jojoba nut oil, essential oils of palo santo, cardamom, vetiver, peru balsam, *nutmeg, pink pepper. **Organically grown or wildcrafted*

PALO SANTO BODY BUTTER

Overview of Wild Alchemy Collection

The intention behind the Wild Alchemy Collection is to add a touch of luxury to our existing signature line, using exotic ingredients sourced from around the globe. The result: synergistic, supercharged products with focused refinement that transforms your skin.

What Makes It Luxury?

This specialty collection is a culmination of our experiments and our experience—not only with organic, biocompatible formulas designed in-house, but also with the worldwide growers who harvest the nutrient-dense ingredients we enhance. Each ingredient is chosen not only for its individual high-performance properties and kinship to environment and community, but also for its synergy with other plants.

What Makes It Wild?

Because of their unique qualities, the individual ingredients used throughout

this collection—like kakadu plum, apple, acai and copper-infused mountain spring water—each require their own precise method of extraction and enhancement to increase their bioactivity, which allows the skin to absorb all of the nutrients to their fullest potential!

How Does Wild Fruit Serum Differ from the Signature Serums?

Overall, the unique extracts and plant cells in this serum help to enhance your natural beauty: texture, tone, firmness and radiance. Wild Fruit Serum harnesses the same qualities as both Anti-Aging Serum and Citrus Stem Cell Serum combined, delivering potent anti-aging and brightening properties to the skin, while providing deep level hydration. We refer to this serum as the “crème de la crème” of our entire serum collection.
